Applications Operations Analyst
Lakeside

Be part of something GREAT

Precision.
Engineered.
Through our people, products and service.

IMI Precision Engineering is a world leader in motion and fluid control technologies. Wherever precision, speed and engineering reliability are essential; we deliver exceptional solutions which improve the productivity and efficiency of our customers' equipment.

As a business, we aim to UNDERSTAND our customers' challenges. We then CONNECT our products, people and expertise in order to DELIVER exceptional service and solutions. These IMPROVE the performance of our customers' machinery. We call this Engineering GREAT, and we deliver it to customers through a world-class portfolio of high performance products, through close partnerships and problem-solving, and through a global network of support which ensures reliable local delivery, all over the world.

Engineering GREAT is our vision – help us get there.

Job purpose

This role operates as a leader within the Global Application Management Services (GAMs) within the IT department and is responsible for the development, configuration and day to day management of global application platforms and associated technologies.

In the role you will be working closely with peers, operationally managing and measuring the application solutions ensuring change management, application availability, data integrity and appropriate resource allocation.

The role is expected to develop technical guidance and templates to allow for rapid onboarding of applications into GAMs as well as offering direction when peripheral applications and services are acquired.

Location - Lakeside

What we're looking for

- Experience working with high volume, business critical, large capacity systems in a 24x7 environment.
- Proficient in SQL queries, CL and RPG programming including the ability to write advanced analytical queries and functions.
- Experience of reporting / data query solutions such as Crystal Reports and AS400 / iSeries Query.
- Strong understanding of database concepts, design and management.
- Comprehensive knowledge of information systems technology, including ERP (JD Edwards) and Application management.
- Experience of migration techniques and ETL (extract, transform, load) tools.
- Understanding of best practices and tools (ITIL) and an understanding of modern trends with regards application provision.
- Information Technology change management and governance.
