GREAT
↙

Precision. Engineered. Through our people, products and service.

IMI Precision Engineering is a world leader in motion and fluid control technologies. Wherever precision, speed and engineering reliability are essential; we deliver exceptional solutions which improve the productivity and efficiency of our customers' equipment.

As a business, we aim to UNDERSTAND our customers' challenges. We then CONNECT our products, people and expertise in order to DELIVER exceptional service and solutions. These IMPROVE the performance of our customers' machinery. We call this Engineering GREAT, and we deliver it to customers through a world-class portfolio of high performance products, through close partnerships and problem-solving, and through a global network of support which ensures reliable local delivery, all over the world.

Engineering GREAT is our vision – help us get there.

Job purpose

This role is responsible for the effective management of the JD Edwards Competence Centre within the Global Application Management Services (GAMs) function.

The role will primarily focus on the operational management and planning of the JDE ERP system and associated applications/interfaces; including governance, environment management, release management and 3rd party partner management ensuring operational efficiency, maximization of uptime / performance and business continuity. In addition, you will lead decision making in respect of standards, evolution, version planning, change, configuration, release management and development / testing / documentation as well as management of interfaces with the various global JDE instances/environments.

Location Lakeside

What we're looking for

- Experience in the development and operational management of global applications services.
- Extensive exposure to JDE ERP
- Operational/functional expertise in JDE
- Strong advocate of system standards and policy enforcement.
- Experience developing and managing an application competence centre bartron for a global business.
- Strong understanding of database concepts, design, and management.
- Experience of migration techniques and ETL (extract, transform, load) tools.
- Proven vendor management leadership.
- Proven experience in a senior IT technical leadership role.
- Project management experience including concept to implementation.
- Strong problem solving and analytical skills.
- Sound understanding of ITIL (incident, problem and CMDB) service management and delivery techniques.
