

Senior Technical Analyst Lakeside

Be part of
something
GREAT
↙

**Precision.
Engineered.
Through our people, products and
service.**

IMI Precision Engineering is a world leader in motion and fluid control technologies. Wherever precision, speed and engineering reliability are essential; we deliver exceptional solutions which improve the productivity and efficiency of our customers' equipment.

As a business, we aim to UNDERSTAND our customers' challenges. We then CONNECT our products, people and expertise in order to DELIVER exceptional service and solutions. These IMPROVE the performance of our customers' machinery. We call this Engineering GREAT, and we deliver it to customers through a world-class portfolio of high performance products, through close partnerships and problem-solving, and through a global network of support which ensures reliable local delivery, all over the world.

Engineering GREAT is our vision – help us get there.

Job purpose

Reporting to the Global Head of Infrastructure Dev Ops & Architecture you will be responsible for the strategic direction, architecture and implementation of infrastructure applications. This will be including but not exclusively limited to Microsoft Exchange, SCCM, Office 365, collaboration software, NOC management and service delivery.

This position has both operational and strategic responsibility for ensuring the availability, integrity, and security for all infrastructure shared applications.

You will be a key member of the Global Operations and Architecture team working collaboratively to drive forward the IT operational and strategic services, standard and policies.

Location - Lakeside

What we're looking for

- Experience developing, planning and executing infrastructure initiatives.
- Project management experience.
- Good problem solving/analytical skills.
- Experience working with high volume, transactional, large capacity systems.
- Experience in migrating a large global business to Microsoft Office 365.
- Managing Disaster Recovery strategy and operational effectiveness.
- Have a broad understanding of Infrastructure technologies.
- Vendor management at an enterprise level.
- Sound understanding of Monitoring\Reporting\Inventory Applications.
- Sound understanding of ITIL service management and delivery techniques.
- Strong technical understanding of Microsoft Server technologies, Networking, and Storage principals.
