

Declaration by the Manufacturer

to Directive 2014/34/EU (ATEX)

Equipment: pneumatically actuated spool valves
 Ordernumbers:

V	6	*	*	*	D	*	A	-	X	*	*	*	0
		0	A	3		D				A	0	2	
		0	P	4		7				P	0	9	
		1	B	5									
		1	R	6									
		2	C	7									
		2	S	8									
		3	D	A									
		3	T	B									
				C									

Herewith the manufacturer declares that the named products are suitable for use in potentially explosive atmospheres of Zones 1 and 2 (gases) as well as in Zones 21 and 22 (dusts) if they are within their specification.

Those valve as non-electrical apparatus are not marked additionally as they do not contain an own potential ignition source and do therefore not comply with the ATEX directive.

It is to pay attention that no flammable fluids are allowed. The maximum surface temperature of the valve depends on the fluid temperature and the ambient temperature and must be below the ignition temperature of the explosive atmosphere.

When the valves are installed, it is to ensure that they will not be electrically isolated. A conductive contact for grounding or potential compensation can be obtained e.g. by using fastening devices.
