1) Pilot air supply through port 1

2) Pilot air supply through port 12/14

Valve functions designations:

NO = Normally open

NC = Normally closed

NOTE: The supply ports for the 2x2/2 valves are port 3 & 5 on the end plate. Therefore the flow path is from port 3 to port 2 or port 5 to port 4. Port 1 is only used to supply internal pilot pressure. Therefore care must be used when selecting other valves to be used on the same manifold as the 2x2/2's. You may be required to use isolation plugs in ports 3 & 5 to ensure proper operation.

Protection classification (IP Code)

All VS26 valve manifolds fulfill IP65 and NEMA4 ratings.

Power supply and precautions

All VS26 24 V d.c products are designed to be used with a protective extra low voltage (PELV) power supply.

All VS26 115 V a.c products correspond to the protection class I.

Connection of the protective earth (PE) ground is required.

ATEX

The 24 V d.c Multipole and Fieldbus valve manifolds fulfil the requirement of the standard 94/9/EC for intended use in hazardous locations.

Equipment group, category, type of protection:

II 3 G EEx nA II T4
 II 3 D IP65 T135°C
 -15°C < t_{amb} < 50°C

The Declaration of Conformity of the valve islands was conducted by Electrosuisse, who issued number SEV 04 ATEX 0114 X.

Please review all ATEX data and notes in the maintenance and instruction booklet to eliminate any risks, allowing for safe function of the valve manifolds.
