

5/2 & 5/3 Valves Solenoid and Pilot Operated G¹/₄

- High flow compact valves
- Sub-base and low profile manifolds
- Light weight, long life corrosion resistant materials
- Multipole and Fieldbus compatible
- Flexible single step expansion

Technical Data

Medium:

Compressed air, filtered to 40µm, lubricated or non-lubricated

Operation:

Spool valve, indirectly actuated. Cylinder ports in valve or base

Mounting:

On sub-base or manifold - Din-Rail mounting option for sub-base assembly

Port Size:

G¹/₄

Operating Pressure:

Maximum 10 bar. For details see overleaf

Flow Characteristics:

Size	Function	'C'	'b'	'A'	l/min	Cv	Kv
G ¹ / ₄	5/2	4,92	0,23	17,31	1152	1,17	1,02
G ¹ / ₄	5/3 APB	3,76	0,14	13,95	1014	1,03	0,90

Ambient Temperature:

-20°C to +80°C Pilot models

-20°C to +50°C Solenoid models

*Consult our Technical Service for use below +2°C

Materials

Aluminium alloy body. Glass filled PA or glass filled PPS end caps. Glass filled PBT solenoid adapters aluminium alloy pistons and spool with HNBR seals. Aluminium alloy Sub-bases and Manifolds with NBR gaskets.

For further technical data on Multipole Systems and complete Valve Islands see Section 5.4.156

Ordering Information

To order, quote model number and voltage code from tables overleaf, e.g. V14B517A-B213A for a Solenoid Pilot Actuated, Spring Return model fitted with a 24 V d.c. coil and screwdriver operated manual override.

* Insert Voltage Code from table (see page 3.)

‡ Pressure to port 5 must not be less than the stated pressure for valve type.

† Gasket type supplied with the valve, for details see section 5.4.155.05.

Type Y gaskets are supplied with the Fixed Length Manifold and the Single Station Sub-base.

APB = All Ports Blocked, COE = Centre Open Exhaust, COP = Centre Open Pressure.

V14B*DDA Models 5/3 Double Pilot Valves

Surface Mounting Details

Functional Valve Gaskets

For mounting, please use the following gaskets:

Modular Sub-base Gasket supplied with valve

Single Station Sub-base and Fixed Length Manifold Gaskets supplied with base*

***Twin Supply Valves** Gasket supplied with valve

For Modular Sub-base

V10041-C95 - Internal Pilot Supply Gasket

Gasket Type: W supplied with all internal pilot supply valves

V10041-C96 - External Pilot Supply Gasket

Gasket Type: X supplied with all external pilot supply valves and pilot operated valves

For Fixed Length Manifold and Single Station Sub-bases – V10121-G01 and V10221-G01

V10238-C01 - Internal Pilot Supply Gasket

Gasket Type: Y Supplied with Fixed Length Manifolds and Single Station Sub-bases

V10239-C01 - Twin Supply Gasket

Gasket Type: Z Supplied with Twin Supply Valves

For Single Sub-base – V10121-G01, V10221-G01

V10381-C01 - External Supply Gasket

Pressure Options - Fixed Length Manifold Systems

Pressure Options - Sub-base Systems

For further pressure configurations contact our Technical Service

Modular Sub-base assemblies for DIN-Rail or surface mounting

Modular Sub-base Assemblies

Modular Sub-base assemblies for 2 to 20 valves.

V14BAX-XXXXX** Weight: $(N \times 0,138) + 0,584$ Kg
Side ported

V14BCX-XXXXX** Weight: $(N \times 0,140) + 0,584$ Kg
Bottom ported

** = 02 to 20

Modular Sub-base Assemblies with Ø8 Push-in Fitting

Modular Sub-base assemblies for 2 to 20 valves.

V148AX-XXXXX** Weight: $(N \times 0,135) + 0,584$ Kg
Side ported

V148CX-XXXXX** Weight: $(N \times 0,137) + 0,584$ Kg
Bottom ported

** = 02 to 20

Dual Pressure Modular Sub-base Assemblies

Modular Sub-base assemblies for 2 to 20 valves. Allows the supply of two different inlet pressures simultaneously.

V14BAX-**XXX** Weight: $(N \times 0,138) + 0,584$ Kg
Side ported

V14BCX-**XXX** Weight: $(N \times 0,140) + 0,584$ Kg
Bottom Ported

** = 01 to 19 to indicate position of Dual Pressure Blanking Plate, e.g V14BAX03-07XX indicates a 10 station base divided into groups of 3 and 7.

Dual Pressure Modular Sub-base Assemblies with Ø8 Push-in Fittings

Modular Sub-base assemblies for 2 to 20 valves. Allows the supply of two different inlet pressures simultaneously.

V148AX-**XXX** Weight: $(N \times 0,138) + 0,584$ Kg
Side ported

V148CX-**XXX** Weight: $(N \times 0,140) + 0,584$ Kg
Bottom Ported

** = 01 to 19 to indicate position of Dual Pressure Blanking Plate, e.g V148AX03-07XX indicates a 10 station base divided into groups of 3 and 7.

DIN-Rail Mounting Kit (A)

V10319-K30

0,008 Kg

For mounting on DIN-Rail

Single Station Sub-base - Side Ported with Pilot Ports

Single Station Sub-base

V10121-G01

0,235 Kg

G^{1/4} side ported with pilot ports

Ports 1, 2, 3, 4, 5, 12 and 14 on side

Supplied with Internal Pilot Supply Gasket - V10238-C01

For Twin Supply Valves, gasket No. V10239-C01 (supplied with the valves) should be used.

For external supply valves gasket V10381-C01S should be used.

Single Station Sub-base - Bottom Ported with Pilot Ports

Single Station Sub-base

V10122-G01

0,235 Kg

Ports 1, 2, 3, 4, 5, 12 and 14 on bottom

Supplied with Internal Pilot Supply Gasket - V10238-C01

For Twin Supply Valves, gasket No. V10239-C01 (supplied with the valves) should be used.

For external supply valves gasket V10381-C01S should be used.

Single Station Sub-base - Bottom Ported

Single Station Sub-base

V10486-G01

0,051 Kg

Ports 1, 3 and 5 on bottom

Supplied with Internal Pilot Supply Gasket - V10238-C01.

For twin supply valves gasket no. V10239-C01(supplied with the valves) should be used.

Fixed Length Manifold

Type	No. of stations	A	B	Weight (Kg)
V10028-G01	1	45	-	0,158
V10028-G02	2	70	58	0,247
V10028-G04	4	110	98	0,398
V10028-G06	6	150	138	0,544
V10028-G08	8	190	178	0,693
V10028-G10	10	230	218	0,844
V10028-G12	12	270	258	0,997

Supplied with Internal Pilot Supply Gaskets V10238-C01. For Twin Supply Valves, gasket No. V10239-C01 supplied with the valves should be used.

Type	A	B
V10320-K01	11,20	14
V10320-K02	8,75	14

Blanking Plugs

For dual pressure supply on Fixed Length Manifold

V10320-K01

0,008 Kg

For ports 3 and 5 on Fixed Length Manifold

V10320-K02

0,005 Kg

For port 1 on Fixed Length Manifold

Blanking Plate

V14B517A-Q2700

0,014 Kg

Blanking Plate for blocking off unwanted station. Supplied with gaskets for Sub-base and Manifold mounting.

Intermediate Supply and Exhaust Module

V14B517-Q240G

0,038 Kg

G¹/₄. Provides additional porting on Modular Sub-base or Fixed Length Manifold systems. Occupies one valve station. Supplied with gaskets for Sub-base and Manifold mounting.

Can be used to:

Improve supply flow

Increase exhaust capacity

Pneumatically separate valves on Valve Island for fail safe in emergency

Supply and exhaust Twin Supply Valves

DIN-Rail Mounting Kits

V10319-K30

0,008 Kg

Kit for mounting side ported modular sub-bases on DIN 46277-3, BS5584 and CENELEC EN 50-022 mounting rail.

DIN-Rail

V10009-C00

0,312 Kg

1 Metre

Blanking Gasket Set

V10040-K96

0,006 Kg

For dual or Multi-pressure Supply on Modular Sub-base.

Set of 3 sub-base to sub-base gaskets for blanking port 1, ports 3 & 5 or ports 1,3 & 5.

(A) Gasket for blanking ports 1, 3 and 5.

(B) Gasket for blanking port 1

(C) Gasket for blanking ports 3 and 5.

Pressure Indicator

V14B517A-Q2800

0,003 Kg

G¹/₄ port plug with integral pressure indicator. Replaces standard port plugs. Minimum 3 bar operating pressure.

Pressure Regulator Block

V14B517A-Q210*

0,155 Kg

Available for operation over pressure 0-10 bar.

Part Number	
V14B517A-Q2103	Dual Regulation (2&4)
V14B517A-Q2106	Mono Regulation (2 only)
V14B517A-Q2109	Mono Regulation (4 only)

Pressure Gauge Kit

V14B517A-Q212*

0,020 Kg

Available with dual and mono pressure gauges.

Part Number	
V14B517A-Q2120	Dual Pressure Gauge
V14B517A-Q2121	Mono Pressure Gauge

For use with V14B517A-Q210* Pressure Regulator Block

Flow Regulator Block

V14B517A-Q2201

0,140 Kg

Dual regulation (ports 2 and 4).

Pressure Switch Assembly

V14B517A-Q1700

0,120 Kg

Used in conjunction with a suitable PLC based control system. Valves will not operate until the inlet pressure on the valve island is above a preset level.

Accessories

For Connecting Plugs and Light Emitting Seals see section 7.7.001.

Warning

These products are intended for use in industrial compressed air systems only. Do not use these products where *pressures* and *temperatures* can exceed those listed under '**Technical Data**'.

Before using these products with fluids other than those specified, for non-industrial applications, life-support systems, or other applications not within published specifications, consult Norgren.

Through misuse, age, or malfunction, components used in fluid power systems can fail in various modes. The system designer is warned to consider the failure modes of all component parts used in fluid power systems and to provide adequate safeguards to prevent personal injury or damage to equipment in the event of such failure.

System designers must provide a warning to end users in the system instructional manual if protection against a failure mode cannot be adequately provided.

System designers and end users are cautioned to review specific warnings found in instruction sheets packed and shipped with these products.
