EXCELON® 74
Filter-Regulator-Lubricator Combination Units
3/8″, 1/2″, 3/4″ Port Sizes

- **True modularity with Norgren Quikclamp™ connections**
- **Quick release bayonet bowl**
- **Lubricator flow sensor provides a nearly constant oil/air ratio over a wide range of air flows**
- **All around (360°) visibility of the lubricator sight-feed dome simplifies installation and adjustment**
- **Regulator balanced valve minimizes effect of variation in the inlet pressure on the outlet pressure**

Use Micro-Fog models in applications containing one or more points of lubrication.
Use Oil-Fog models to lubricate a single tool, cylinder, or other air driven device.
