> Port size: G1/4
> Precision instruments with integral pilot to ensure very close pressure control in a compact form
> Panel mounting facility

Note: Not recommended for dead-end applications

Technical features

Medium:
Compressed air
Note: 5 μm prefiltration and oil-free are required!

Maximum inlet pressure:
8 bar (116 psi) (low)
10 bar (145 psi) (standard)
14 bar (203 psi) (high)

Flow:
See diagrams on page 2

Relieving:
Standard

Pressure range:
0,07 ... 4 bar (1 ... 58 psi) (standard)
0,02 ... 0,5 bar (0,2 ... 7 psi) (low)
0,4 ... 10 bar (5,8 ... 145 psi) (high)

Port size:
G1/4

Gauge port:
See table below

Ambient/Media temperature:
0 ... +70°C (+32° ... +158°F)

Version with gauge:
0 ... +65°C (+32° ... +149°F)

Air supply must be dry enough to avoid ice formation at temperatures below +2°C (+35°F).

Materials:
Body & bonnet: Zinc alloy
Adjusting knob: Acetal resin
Elastomers: NBR

*1) Typical mid-range variance from set pressure with 7 bar inlet at 2 dm³/s

Note: 11818 is not a constant bleed device, when being used under flow conditions no air is consumed.

Air bleed is only effective under zero flow conditions as in a dead end application.
Flow characteristics

Standard pressure version:
Inlet pressure 7 bar (100 psi); pressure range 0.1 ... 4,1 bar (1 ... 60 psi)

Regulating characteristics

High pressure version:
Inlet pressure 14 bar (200 psi); pressure range 0.2 ... 10,35 bar (3 ... 150 psi)

Accessories

Gauge
Ø 40 mm, Port size R1/8

**Dimensions**

- **Gauge port R1/4** for models 11-818-979, 11-818-993 and 11-818-991 only
- **Panel mounting hole** > ø 12 mm
- **Wall thickness** < 6 mm

**Warning**

These products are intended for use in industrial compressed air systems only. Do not use these products where pressures and temperatures can exceed those listed under "Technical features/data".

Before using these products with fluids other than those specified, for non-industrial applications, life-support systems or other applications not within published specifications, consult IMI Precision Engineering, Norgren Inc.

Through misuse, age, or malfunction, components used in fluid power systems can fail in various modes.

The system designer is warned to consider the failure modes of all component parts used in fluid power systems and to provide adequate safeguards to prevent personal injury or damage to equipment in the event of such failure.

System designers must provide a warning to end users in the system instructional manual if protection against a failure mode cannot be adequately provided.

System designers and end users are cautioned to review specific warnings found in instruction sheets packed and shipped with these products.
