Regulation (EC) No. 1907/2006 the Registration, Evaluation, Authorisation and Restriction of Chemicals (REACH)

REACH aims to improve the protection of human health and the environment through the better and earlier identification of the intrinsic properties of chemical substances. This is done by the four processes of REACH, namely the Registration, Evaluation, Authorisation and Restriction of Chemicals.

REACH aims to make the use of chemical substances fully traceable from manufacture to end-use.

Registration of Chemical Substances

Norgren is a "downstream user" within the meaning of REACH. Our products are considered "products" and not "substances" and as such are not subject to registration. Our raw materials used are either not subject to compulsory registration or are registered by our suppliers. No chemical substances are released from our products if used according to our latest specification.

We hereby confirm that all products made by Norgren comply with REACH.

Substances of Very High Concern (SVHC)

In accordance with Article 33 (1) of REACH, we are obliged to inform our customers if a component of a product supplied contains more than 0.1 % by weight of a substance on the SVHC candidate list (<https://echa.europa.eu/candidate-list-table>). This applies regardless of the % by weight of the SVHC within the complete product. The following table lists products with components containing more than 0.1 % by weight of a SVHC.

Part Number	Product	Sub product	SVHC >0,1%	CAS-Nr.
VCB22xxx	Valve	Connector	Bis(2-ethylhexyl) phthalate(DEHP)	117-81-7
	Valve	Connector, Screw, Guide tube	Lead (Pb)	7439-92-1
